

Cascade Citizen Wildlife Monitoring Project Volunteer Feedback

Return to: David Moskowitz, davem@wildernessawareness.org

Please take a moment to share your thoughts with us on the quality of the training(s) you attended for this year and your experience this field season. Your feedback is invaluable in helping us continue to increase the quality of trainings and the overall effectiveness of the project!

Pre-training Communication: Did you receive thorough and timely communication to prepare you for your training? How could this have been improved for you?
yes

Training organization, location and schedule: Please comment on the timing, length and location of the training(s) you attended.

Okay although with previous experience, 2nd session could be shorter

Curriculum: Did the material we covered prepare you for your field season? What were the most valuable topics? Is there anything you believe should have been covered more thoroughly?

Starting the studies before migrating animals left the area

Transect Logistics and Organization: Please comment on coordination and implementation of transects.

Start sooner in the year-first snowfall so you can plot how migrating animals leave

Data collection: Any comments or thoughts on the projects data collection methods and protocol

Anything else?

Wear visable clothing and have tour leaders give explicit instructions of what happens if you become separated.
